ELSEVIER International Journal of Mass Spectrometry and Ion Processes 138 (1994) 327–329

SUBJECT INDEX

Annealing
Theoretical studies of fullerene annealing and fragmentation 113
Appearance energy
Appearance and ionization energies of singly, doubly and triply charged C_{60} and its fragment ions produced by electron impact ionization 77

C_{60}
Ab initio electronic structure calculations on highly charged cations of the C_{60} cluster 107
Appearance and ionization energies of singly, doubly and triply charged C_{60} and its fragment ions produced by electron impact ionization 77
Ion beam studies of atomic ion collisions with C_{60}: chemistry at surface, substitutional, and endohedral sites 173
Carbon cluster cations
Structures and energies of small carbon clusters: what experiment and theory have to say about C_8^+, C_9^+ and C_{10}^+ 33
Carbon cluster ions
Gas-phase reactions of carbon cluster ions with isomeric chloropropenes 49
Carbon clusters
Cleavage patterns of carbon clusters from impact-induced fragmentation of C_N^-, $N = 10$–50 63
Formation and stability of small metallocarbon clusters: what is the specificity for the formation of stable metallofullerenes? 297
Carbon rings
Small carbon rings: dissociation, isomerization, and a simple model based on strain 17
Cations
A mass spectrometric investigation of the gas phase ion–molecule reactions of fullerene cations and dications with various neutral molecules 241
Chemical ionization
Pyrolytic and gas phase fullerene derivatization reactions 209
Chloropropene
Gas-phase reactions of carbon cluster ions with isomeric chloropropenes 49
Cluster ions
Ion beam studies of atomic ion collisions with C_{60}: chemistry at surface, substitutional, and endohedral sites 173
Structures and energies of small carbon clusters: what experiment and theory have to say about C_8^+, C_9^+ and C_{10}^+ 33
Cluster–beam impact
Cleavage patterns of carbon clusters from impact-induced fragmentation of C_N^-, $N = 10$–50 63
Clusters
Formation and stability of metallocarbohedrenes: $Ti_xM_yC_{12}$ ($x + y = 8$, M = Nb, Ta, Y, and Si) 275
Is $n = 60$ a magic number for C_n^+ clusters or part of a magic shell? 95
Cycloaddition
Pyrolytic and gas phase fullerene derivatization reactions 209

Dissociative ionization
Appearance and ionization energies of singly, doubly and triply charged C_{60} and its fragment ions produced by electron impact ionization 77

Electron affinities
Determination of the electron affinities of fluorinated fullerenes ($C_{60}F_{44,46}$, $C_{70}F_{52,54}$) by Fourier transform mass spectrometry 263
Electron impact ionization
Appearance and ionization energies of singly, doubly and triply charged C_{60} and its fragment ions produced by electron impact ionization 77
Electronic sputtering
Plasma desorption mass spectrometry in studies of formation and sputtering of fullerenes by MeV atomic ions 159

0168-1176/94/$07.00 © 1994 Elsevier Science B.V. All rights reserved

Electronic structure calculations
Ab initio electronic structure calculations on highly charged cations of the C_{60} cluster 107

Fluorinated fullerenes
Determination of the electron affinities of fluorinated fullerenes ($C_{60}F_{44,46}$, $C_{70}F_{52,54}$) by Fourier transform mass spectrometry 263
Fourier transform mass spectrometry
Determination of the electron affinities of fluorinated fullerenes ($C_{60}F_{44,46}$, $C_{70}F_{52,54}$) by Fourier transform mass spectrometry 263
Fragmentation
Theoretical studies of fullerene annealing and fragmentation 113
FT-ICR
Probing the unusual kinetic behavior of $Si_2C_2^+$ reactions with unsaturated and aromatic compounds 307
FT-ICR spectrometry
Gas-phase reactions of carbon cluster ions with isomeric chloropropenes 49
Fullerene cations
Gas-phase reactions of the buckminsterfullerene cations $C_{60}^{\bullet+}$, C_{60}^{2+}, and $C_{60}^{\bullet 3+}$ with aldehydes, ketones, carboxylic acids, and esters 187
Fullerenes
A mass spectrometric investigation of the gas phase ion–molecule reactions of fullerene cations and dications with various neutral molecules 241
Ab initio electronic structure calculations on highly charged cations of the C_{60} cluster 107
Cleavage patterns of carbon clusters from impact-induced fragmentation of C_N^-, $N = 10$–50 63
Determination of the electron affinities of fluorinated fullerenes ($C_{60}F_{44,46}$, $C_{70}F_{52,54}$) by Fourier transform mass spectrometry 263
Formation and stability of small metallocarbon clusters: what is the specificity for the formation of stable metallofullerenes? 297
Fullerenes and their ions in hydrocarbon flames 133
Ion beam studies of atomic ion collisions with C_{60}: chemistry at surface, substitutional, and endohedral sites 173
Is $n = 60$ a magic number for C_n^+ clusters or part of a magic shell? 95
Plasma desorption mass spectrometry in studies of formation and sputtering of fullerenes by MeV atomic ions 159
Pyrolytic and gas phase fullerene derivatization reactions 209
Small carbon rings: dissociation, isomerization, and a simple model based on strain 17
Smaller carbon species in the laboratory and space 1
Synthesis, separation, characterization, fragmentation, and aggregation of giant fullerenes 149
Tandem mass spectrometry studies of oxygen interactions with fullerenes and metallofullerenes 221
Theoretical studies of fullerene annealing and fragmentation 113

Gas phase ion chromatography
Structures and energies of small carbon clusters: what experiment and theory have to say about C_8^+, C_9^+ and C_{10}^+ 33
Gas-phase ion–molecule reactions
Gas-phase reactions of the buckminsterfullerene cations $C_{60}^{\bullet+}$, C_{60}^{2+}, and $C_{60}^{\bullet 3+}$ with aldehydes, ketones, carboxylic acids, and esters 187
Giant fullerenes
Synthesis, separation, characterization, fragmentation, and aggregation of giant fullerenes 149

Highly charged cations
Ab initio electronic structure calculations on highly charged cations of the C_{60} cluster 107
Hydrocarbon flames
Fullerenes and their ions in hydrocarbon flames 133

Impact-induced fragmentation
Cleavage patterns of carbon clusters from impact-induced fragmentation of C_N^-, $N = 10$–50 63
Injected drift tube technique
Small carbon rings: dissociation, isomerization, and a simple model based on strain 17
Internal energy
Probing the unusual kinetic behavior of $Si_2C_2^+$ reactions with unsaturated and aromatic compounds 307
Interstellar medium
Smaller carbon species in the laboratory and space 1
Ion beam studies
Ion beam studies of atomic ion collisions with C_{60}: chemistry at surface, substitutional, and endohedral sites 173
Ion/molecule reaction
Gas-phase reactions of carbon cluster ions with isomeric chloropropenes 49
Ion–molecule reactions
A mass spectrometric investigation of the gas phase ion–molecule reactions of fullerene cations and dications with various neutral molecules 241
Probing the unusual kinetic behavior of $Si_2C_2^+$ reactions with unsaturated and aromatic compounds 307
Isomers
Probing the unusual kinetic behavior of $Si_2C_2^+$ reactions with unsaturated and aromatic compounds 307

Kinetics
Probing the unusual kinetic behavior of $Si_2C_2^+$ reactions with unsaturated and aromatic compounds 307

Laser-desorption mass spectrometry
Synthesis, separation, characterization, fragmentation, and aggregation of giant fullerenes 149

Magic number model
Is $n = 60$ a magic number for C_n^+ clusters or part of a magic shell? 95
Magic shell model
Is $n = 60$ a magic number for C_n^+ clusters or part of a magic shell? 95
Mass spectrometry
Appearance and ionization energies of singly, doubly and triply charged C_{60} and its fragment ions produced by electron impact ionization 77
Met–cars clusters
Photochemical cleavage of metal–carbon nanocrystals and their reconstruction into met–cars clusters 283
Metal–carbon nanocrystals
Photochemical cleavage of metal–carbon nanocrystals and their reconstruction into met–cars clusters 283
Metallocarbohedrenes
Formation and stability of metallocarbohedrenes: $Ti_xM_yC_{12}$ ($x + y = 8$, M = Nb, Ta, Y, and Si) 275
Metallofullerenes
Formation and stability of small metallocarbon clusters: what is the specificity for the formation of stable metallofullerenes? 297
Tandem mass spectrometry studies of oxygen interactions with fullerenes and metallofullerenes 221
MeV atomic ions
Plasma desorption mass spectrometry in studies of formation and sputtering of fullerenes by MeV atomic ions 159

Oxygen interactions
Tandem mass spectrometry studies of oxygen interactions with fullerenes and metallofullerenes 221

Plasma desorption mass spectrometry
Plasma desorption mass spectrometry in studies of formation and sputtering of fullerenes by MeV atomic ions 159

Pyrolytic reaction
Pyrolytic and gas phase fullerene derivatization reactions 209

Rate constants
Gas-phase reactions of carbon cluster ions with isomeric chloropropenes 49
REMPI ionization
Fullerenes and their ions in hydrocarbon flames 133
Reaction mechanism
Fullerenes and their ions in hydrocarbon flames 133
Red giant
Smaller carbon species in the laboratory and space 1

Selected-ion flow tube
Gas-phase reactions of the buckminsterfullerene cations $C_{60}^{\cdot+}$, C_{60}^{2+}, and $C_{60}^{\cdot 3+}$ with aldehydes, ketones, carboxylic acids, and esters 187
$Si_2C_2^+$
Probing the unusual kinetic behavior of $Si_2C_2^+$ reactions with unsaturated and aromatic compounds 307
Smaller carbon species
Smaller carbon species in the laboratory and space 1
Strain
Small carbon rings: dissociation, isomerization, and a simple model based on strain 17

Tandem mass spectrometry
A mass spectrometric investigation of the gas phase ion–molecule reactions of fullerene cations and dications with various neutral molecules 241
Tandem mass spectrometry studies of oxygen interactions with fullerenes and metallofullerenes 221
Time-of-flight mass spectrometry
Photochemical cleavage of metal–carbon nanocrystals and their reconstruction into met–cars clusters 283
Time-of-flight mass spectroscopy
Formation and stability of small metallocarbon clusters: what is the specificity for the formation of stable metallofullerenes? 297
Transition metals
Formation and stability of metallocarbohedrenes: $Ti_xM_yC_{12}$ ($x + y = 8$, M = Nb, Ta, Y, and Si) 275
